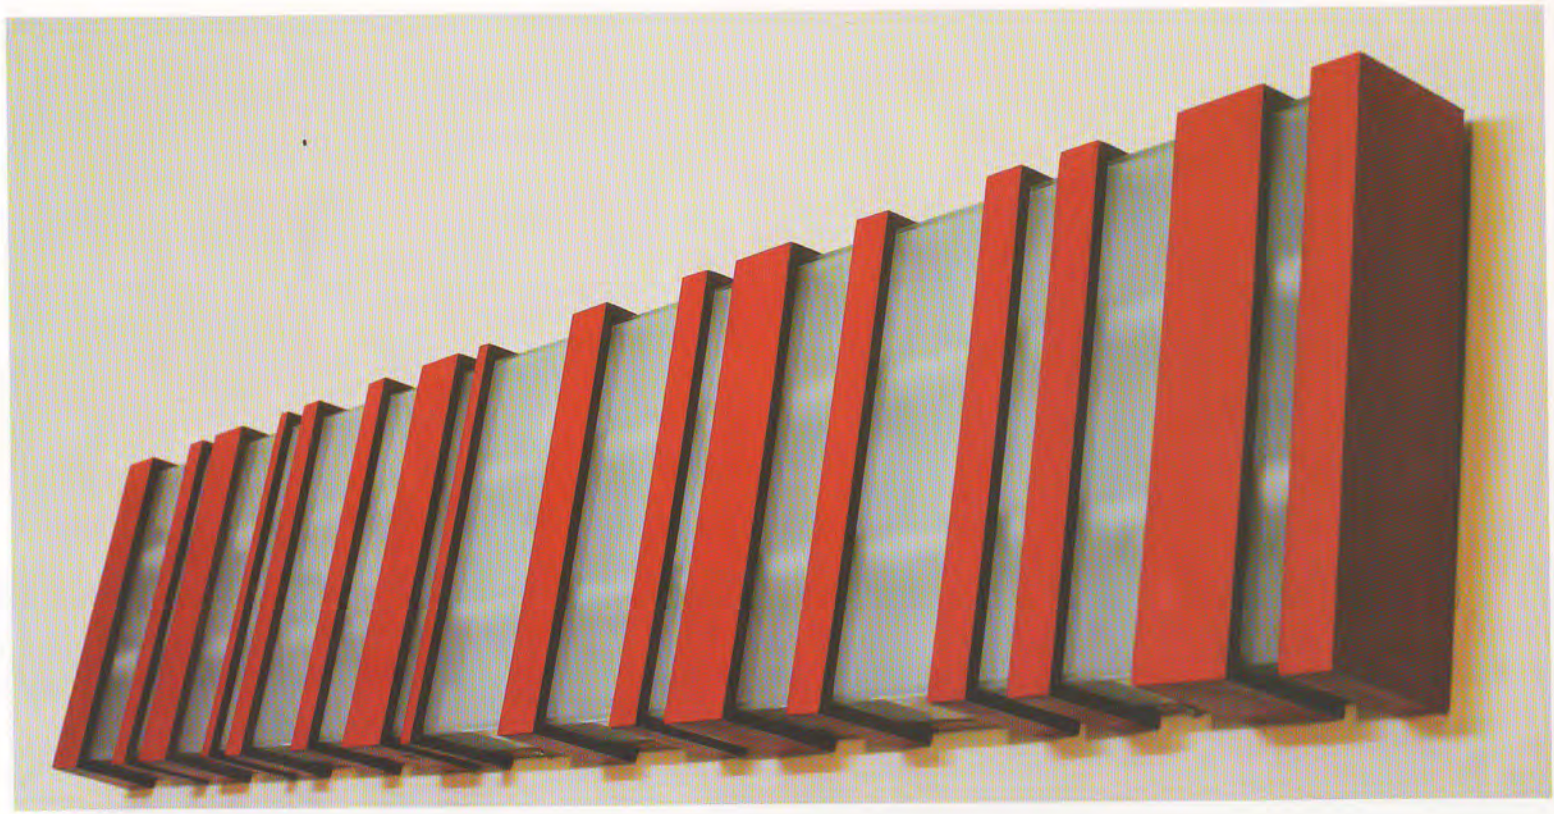
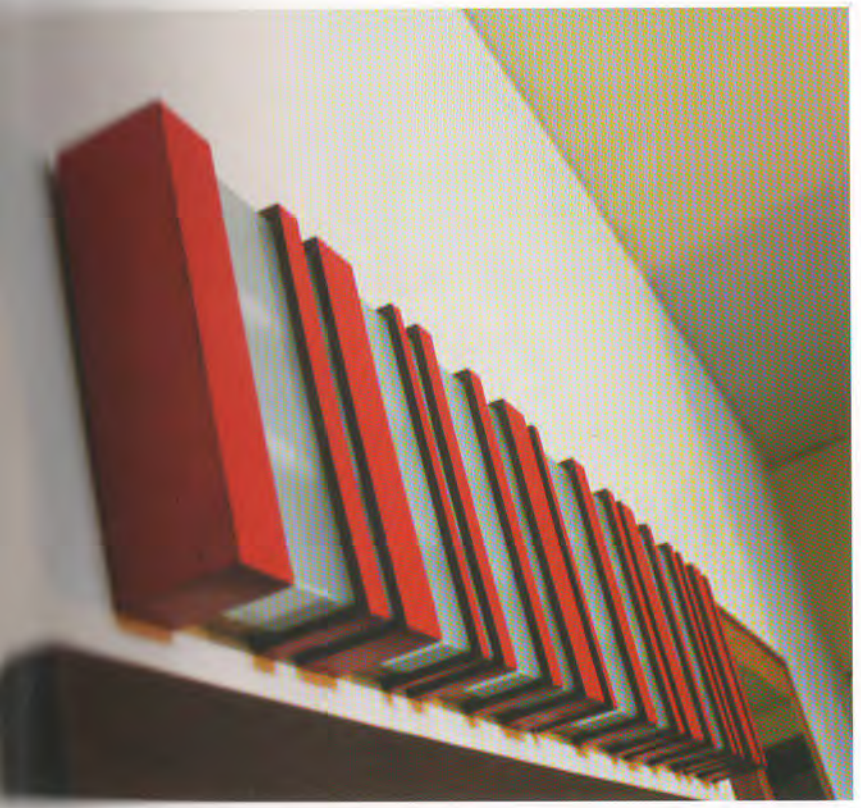
Barcode Light

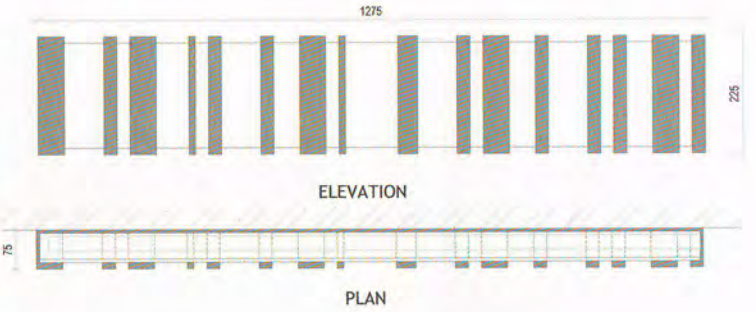
AKDA – Amit Khanna Design Associates



The Barcode Light is designed as an abstraction of the 'barcode' used extensively in the commercial world today and as an integral part of all products that we use. Fabricated as a solid piece, with voids crafted to permit light through, the light is manufactured in various colours and is a notional representation of the playful nature of the solid/void relationship.

Photography by Amit Khanna





Dimensions	H23 x W128 x D8cm
Materials	Laminated plywood, frosted glass
Colours	Red, black, yellow
